 for Community Energy Resilience Hubs (CERH)
 CHM-RFP-2026-001
 Exhibit E - Proposal Cost Form

3. Balance of System shall include Costs related to electrical interconnection, AC/DC wiring, conduits, combiners, distribution panels, and load connections.
4. General Requirements include Mobilization and Demobilization, Project Management and Site Supervision, Temporary Facilities, Project Signs (8' x 4'), Safety and Health Implementations, Insurance and Bonding Compliance Costs, Construction Taxes and Patents (if applicable), and other costs reasonably considered part of general requirements.
5. Pricing shall be based on the conceptual designs provided by CHM. Any deviations or assumptions shall be clearly identified by the Respondent.
6. Pricing shall be subject to reasonable adjustments based on the final Issued-for-Construction (IFC) documents.
